

ЭКОЛОГИЯ ЖИВОТНЫХ

УДК 595.762.12(47-12)

СРАВНИТЕЛЬНЫЙ АНАЛИЗ ВИДОВЫХ СОСТАВОВ ЖУЖЕЛИЦ ПРИБРЕЖНЫХ И ОСТРОВНЫХ ЭКОСИСТЕМ ЗАПАДНОГО КАСПИЯ

© 2011 Абдурахманов Г.М., Нахибашева Г.М., Клычева С.М., Эльдерханова З.М.
Дагестанский государственный университет

Впервые изучен видовой состав жуужелиц прибрежных и островных экосистем Западного Каспия. Приводится сравнительный анализ видового состава жуужелиц прилегающих территорий.

For the first time studied the species composition of ground beetles of coastal and island ecosystems of the Western Caspian. The article provides a comparative analysis of species composition of ground beetles and adjacent areas.

Ключевые слова: жуужелицы, прибрежные и островные территории, видовой состав.

Keywords: carabids, a coastal and an island territories, species composition.

Как известно, процессы флоро- и фауногенеза на определенных территориях протекают под воздействием, общих для них, экологических факторов. Иными словами, на определенных территориях в сообществах протекают своеобразные, свойственные им, характеризующие их процессы, хотя некоторые исследователи не всегда приходят к близким результатам в оценке путей становления фаун.

Разрушение сложившегося сообщества может быть следствием воздействия различных факторов, особенно климатических или обусловленных орографическими процессами. Следует подчеркнуть, что контрастность смен условий в рассматриваемом регионе не была выражена резко на протяжении последних геологических эпох. Тем не менее, многократно повторяющиеся смены трансгрессий и регрессий Каспийского моря вызвали смены растительного мира и животного населения. Общим следствием проявления этой тенденции явилось постепенное обеднение третичного лесного энтомоценоза и замещение его элементами и целыми комплексами фаун аридных областей Европейской, Сибирской, Туранской, Средиземноморской и Переднеазиатской провинций.

Сравнение видового состава жуужелиц прибрежных и островных территорий различных районов Западного Каспия приводится в табл. 1.

Таблица 1

Видовой состав жуужелиц прибрежных экосистем и островов Западного Каспия

№	Видовой состав	Прибрежные экосистемы										Острова				
		Астраханская область	Республика Калмыкия	Республика Дагестан						Республика Азербай-джан		Нордовый	Тюлений	Чечень		
				Брянская коса	Крайновка	Терско-Сунженский район	Бархан Сарыкум	Кизлярский район	Каякент, Вихри	Берикей, Самур	Северный Азербайджан				Апшеронский полуостров	Талыш
	Family CARABIDAE Subfamily CICINDELI- NAE															
1. Genus	MEGACEPHALA Latr. 1802															
	Subgenus Grammognatha Motsch. 1850															
1.	euphratica Dejean 1822											+				

2. Genus	CICINDELA Linnaeus 1758																
	Subgenus Eumecus Linnaeus 1758																
2.	germanica Linnaeus 1758	+	+	+	+	+	+	+	+	+	+	+	+	+	+	+	+
